

# Special Occasion Flattened Bottles

*From R.P. Davidson of Chesterfield*

One of our flattened glass bottles can be used as a cheeseboard, as a chopping board and for presenting lemons and oranges, for serving sushi, or even as an hors d'ouvres tray.

Save a wonderful memento of your Wedding or other special occasion or make a very different gift for someone who has everything. Why not have the wine bottle from the dinner when you proposed, or the first bottle opened at your engagement party or wedding reception, or the bottle from the first toast to the new baby preserved flattened by us and help preserve something special from those days.

The flattened bottles undergo a highly secret flattening process.

We do our best to preserve the bottle labels to maintain your memories.

As well as the potential uses outlined, they make an interesting table or kitchen accessory to surprise and please your guests.

Please feel free to discuss and special requirements with Simon, our proprietor.
